A new window will appear, in which you have to enter the following data:

Check Box: IP address

Pulsate **[Add Route]**

Configure in the EasyBuilder Pro the communication with the PLC with the IP and the AMS NetID of the PLC and having imported the Tags, in this case the PLC has the IP (169.254.170.162) and its AMS NetID (5:100:113:130:1:1)

Once you verify that everything works OK, in the soft **[TwinCAT System Manager]**, activate the configuration in the PLC by pressing the rubik's cube button or in **[Actions] > [Save in record ...]**, if this step is not done, the CONFIGURATION of the PLC is lost, since the parameter of the direction that we have given of the HMI, you have not saved it in persistent memory.
